HEALTH, CHOICE...

EISENHOWER TAKES CARE OF ITS

Our mission:

To provide the best possible plastic surgery care service to active duty service members and other military health care beneficiaries using today's most advanced technology and ensuring the well being of each person we serve.

Our vision:

DDEAMC Plastic Surgery Clinic is an elite military health clinic that provides a personalized care in an environment committed to quality of care to all.

Scope of Service:

The Plastic Surgeon evaluates the need for cosmetic or reconstructive surgery based on those individuals who are good candidates medically and have reasonable expectations of the risks, benefits and the results of the planned procedure. The plastic surgery clinic deals with the repair, reconstruction, or replacement of physical defects of form or function involving the skin, musculoskeletal system, cranio-maxillofacial structures, hand, extremities, and breast and trunk.

Things to consider before coming to plastic surgery...

We have 100% no smoking policy for all of our cosmetic patients including breast reduction patients. Smoking is bad for your health and promotes poor healing of the skin.

For any elective surgery it is advisable that you should have a 30% BMI (Body Mass Index) or less. We do have a policy stating that all of our cosmetic patients will be 30% BMI or less before we will schedule surgery.

FAQ

Q) How can I receive Plastic Surgery?

A) Visit your primary care provider for a referral to our clinic

Q) What if I am waiting on a referral?

A) Call the TRICARE referral center to find out the status of your referral. (706) 787-7169

Q) Does the military give free cosmetic surgery?

A) No, if your condition requires a procedure for a non-medical reason, it is considered cosmetic and requires payment before the procedure.

Q) What is covered by TRICARE?

A) If your condition requires surgery for a medical reason, it is considered reconstruction and will be covered under TRICARE.
